Track ESELAW 2013: 10th Workshop on Experimental Software Engineering - CALL FOR PAPERS

ESELAW 2013 is a forum for researchers and practitioners to report on and discuss new research results in Experimental Software Engineering, bringing together Latin America's academic, industrial and commercial communities. The workshop encourages the exchange of ideas to understand the strengths and weaknesses of software engineering technologies, focusing on the process, design and structure of empirical studies, as well as on results from specific studies. In this perspective, ESELAW emphasizes contributions and original researches on Experimental Software Engineering. All contributions will be peer reviewed.

Topics of interest include, but are not limited to, the following:

- . Studies concerned with software processes and products
- . Evaluation and comparison of techniques and models (cost estimation, analysis and design methods, testing)
- . Reports on benefits derived from using specific software technologies
- . Development of predictive models for software engineering
- . Experiences with research methods: measurement theory, experimental design, qualitative modeling, analysis approaches, grounded theory, protocol studies, families of experiments
- . Development, derivation and/or comparison of organizational models of software development industrial experience in process improvement
- . Quality measurement
- . Process modeling and applications in industry
- . Experience management
- . Systematic reviews and evidence-based software engineering
- . Simulation based studies in software engineering
- . Education and training in experimental software engineering

Authors are invited to submit Papers (max. 14 pages) as per the LNCS style, and submitted via the EasyChair system.

(<https://www.easychair.org/conferences/?conf=eselaw2013>) All the accepted papers will be published by the organization in a book with ISBN number. Additionally, papers will be indexed by DBLP. Acceptance will be based on originality, contribution to the area, quality of the paper, and ability to generate discussion. The best paper will receive an award. We are working to publish the best papers in an international journal special issue.

ESELAW accepts contributions in three major ibero-american languages: English, Spanish and Portuguese.
