Track CibSE 2013: Software Engineering - CALL FOR PAPERS

CibSE (former IDEAS) is the leading research forum on Software-Engineering in Iberoamerica. The main objectives of this conference is to promote high-quality scientific research in iberoamerican countries, supporting the researchers in this community to publish and discuss their work, also fostering collaboration and cross-fertilization among research initiatives. Building over the experience with 15 successful previous editions, CibSE 2013 will be held in Montevideo, Uruguay

Topics of interest include, but are not limited to, the following:

- . automatic software generation
- . formal methods applied to software engineering
- . integration with human-computer interaction
- . languages, methods, processes, and tools
- . model-based engineering
- . ontology applied to software engineering
- . peer-to-peer (P2P) systems
- . proof, verification, and validation
- . quality, measurement, and assessment of products and processes
- . reverse engineering and software system modernization
- . software and service-oriented architectures
- . software development paradigms
- . software evolution and maintenance
- . software product families and variability
- . software reuse
- . search-based software engineering
- . web engineering and web services

Authors are invited to submit Papers (max. 14 pages) as per the LNCS style, and submitted via the EasyChair system.

(<https://www.easychair.org/conferences/?conf=secibse2013>). All the accepted papers will be published by the organization in a book with ISBN number. Additionally, papers will be indexed by DBLP.

Acceptance will be based on originality, contribution to the area, quality of the paper, and ability to generate discussion. The best paper will receive an award. We are working to publish the best papers in an international journal special issue.

CibSE accepts contributions in three major ibero-american languages: English, Spanish and Portuguese.
